

Commandant's READY ROOM

Welcome to another issue of the Starfleet Academy newsletter. Thank you Daniel Dreesbach for putting this issue together. Daniel has been made the Academy's Chief of the Alumni Association as well as the Editor of our newsletter. Congratulations and welcome, Daniel.

Congratulations! Wayne Killough, Jr. on your promotion to Vice Admiral.

Most of you might know by now, but if not, please welcome Reed Bates to our staff. Reed has taken on the position of Scholarship Director. She has been worked tirelessly in order to get the scholarship program underway and ready to accept applications. Even with the short notice we did get four recipients of academy scholarships. I am very proud to announce the names of the four individuals who have become the recipients of STARFLEET Academy Scholarships for 2008.

They are in order of approval:

James Doohan/Montgomery Scott Engineering Scholarship goes to **James R. McLain** from USS Tejas out of R#3

LeVar Burton Educational Scholarship goes to **Jennifer J. Scott** from USS Omega Glory out of R#17

Space Explorer's Scholarship goes to **Angel Avery** from USS Flying Fox out of R#7

DeForest Kelley/Dr. Leonard McCoy Medical Scholarship goes to **Darlene Topp** from USS Hadfield out of R#13.

Congratulations James, Jennifer, Angel, and Darlene.

Every year the academy presents Squadron Awards to the best adult students (Red), cadet students (Blue), and family of students (Gold). There were many and I have sent these on to be listed in CQ 148 along with the list of Boothby Award recipients. Congratulations to all...Awesome.

Students of our academy are not the only recipients of awards. Each year some of our staff receives awards. They were chosen by their peers as well as the administration for the profound work they have accomplished through the year. I'm proud to announce and congratulate the following:

Dean of the Year: Carolyn Donner, Institute of the Year: Institute of Science Fiction Studies (Each director shares this award. They are: Angel Avery, Dean Rogers, Truman Temple and George Ann Wheeler), Director of the Year: Carol Thompson, College of the Year: Angel Avery (College of the Macabre) and Support Staff Member of the Year: Jayden Tyronian

Some directors have sent me highlights regarding their colleges in order to promote and enlighten the members about what they are missing. I include these highlights as space permits in my submissions to the CQ. If you have sent me something and haven't seen it yet, don't worry, it will get in. I'm submitting them in the order I receive them from the directors.

That's it for now from the 'Dant's desk. See you next time around.

Deb Kern's academy Cover

It is with deep regret that I pass on the news of the loss of one of our members and dear friend to many. Debra Kern crossed over to the other side on July 15, 2008. Her obituary is below.

Technical sergeant, U.S.A.F., retired Debra I. Kern, 53, of Alamogordo, passed away July 15, 2008, at the family home. She was born Aug. 17, 1954, in Jacksonville, Fla., to Howard and Irene Hirst. She was a U. S. Air Force veteran who retired Jan. 1, 1999, after serving in Desert Shield and Desert

Storm. She was a life member of the VFW, American Legion and Disabled American Veterans. She enjoyed playing softball and her pets. She married Jack Kern May 27, 1989, in Colorado Springs, Colo. She is survived by her husband, Jack Kern, of the family home; and her sister, Diane Hirst, and her mother, Irene Hirst both of Sarasota, Fla.

=====

One of my first duties as the newly named Commandant of Starfleet Academy on April Fool's Day of 1999, was to read a proposal for a brand new school suggested by Deb Kern. Her presentation was spot-on and so clearly laid out that I gave her the "go ahead". The Klingon Warrior Academy (KWA) was open for business almost immediately! Deb's KWA was one of Starfleet Academy's most popular schools. Eventually she also created a similar course/college for the Starfleet Marine Academy. Deb was one of Starfleet Academy's hardest working Directors... always coming up with new ideas, and ways to attract students. And believe me... Deb was a Klingon through-and-through!

Throughout the years, Deb and I became close Friends, even though we'd never met face-to-face. E-Mail and Alexander Graham Bell Friends are just as near and dear to us, as I'm sure many of you know.

From the very start, Deb called me "Bwana Mama" or "Big Sis" and I called her my "Little Sis". And of course we also know her as "ke'debwov-vestai-Veska"! I hope I spelled that correctly! No matter how hard Deb tried to teach me to speak Klingon... well, it never worked!

I'll never forget the "Take a Pie In The Face" she and Nancy Lynch of the USS Mir, worked up. I think Deb got a little bit TOO MUCH enjoyment out of that!!! What a fun-loving gal she was... and I like to think... she still is! Yes, she's passed on to whatever comes next in our existence, but I'll bet she's spreading her special kind of humor wherever she is now!

I lift a large glass of Blood Wine in honor of ke'debwov-vestai-Veska! Quapla, Deb! You made it!!

Marlene Miller

The Cadet Challenge

Modherr oiuu'n Lloannen'galae Eredhin Khre'Riov Ekhaem tr'Hveinn

For those of you who do not read Rihannsu (or Romulan), here is the translation (roughly): "Challenging all Starfleet's Cadet, by Vice Admiral Richard Hewitt."

First off, I am VADM Richard Hewitt, the Director of Cadet Romulan Orientation College at the Institute of CADET STUDIES (IOCS:CROC). I have three courses in the CROC school. They are: CROC 101 - The People and the Tal' Shiar; CROC 102 - The Government; and CROC 103 - Military, Technology & History. All these courses are free if taking on line.

Well, here is my challenge for all Cadets in SFI. First, you need to go the Starfleet Academy web site at <http://academy.sfi.org/index.php>. There you will be able to request all three courses. Then all you need to do is to take them and pass all of them with a score of 100% (Distinction). Once a Cadet has done this, I will send them a Romulan pin (at no cost to them).

Mnekha daendle (or Good fortunate). I hope to hear from a lot of you, Cadet soon.

VADM Richard Hewitt
Director of IOCS:CROC

The Romulan Praetor Shinzon

A Case Study Analysis

By Captain Lee Vitasek

Aug. 14, 2008

For my project I have chosen the Romulan Praetor Shinzon. While he may not be strictly a Romulan, he was engineered by them, lived with them, and was later oppressed by them. What he succeeded in doing as Praetor irrevocably changed the direction of the Romulan Star Empire's future.

To understand Shinzon we must look back to his beginning. He was cloned from a cell taken from Jean Luc Picard in 2348, a part of Praetor Narviat's program of clandestine infiltration of the Federation. Shinzon was initially raised and trained for a mission to replace Picard. The Romulans engineered this clone with a temporal DNA sequence, which would allow him to skip thirty years of his life in order to reach Picard's actual age more quickly. Problems arose when a new faction achieved prominence in the Imperial Senate in the early 2360s. While Narviat retained his post as Praetor the faction terminated the infiltration program. Afraid the clone might be discovered and war break out, the young Shinzon was exiled to the dilithium mines of Remus, where the Romulans assumed a child could never survive.

Shinzon's first ten to twelve years of life were spent in preparation to replace Jean Luc Picard in the Federation as a spy. He was exposed to Romulans daily as he grew up. He would have learned first hand that the Romulans believed they were a superior life form and destined to rule the galaxy.

From his earliest moments, Shinzon would be aware that the Romulans are very xenophobic about other races and that they are quite paranoid. The problem with growing up in this environment is that a child will instinctually emulate the behavior they witness.

Even more so in the case of Shinzon, who may not have been exposed to any other human being.

When the Romulans took him to the dilithium mines on Remus he became aware of just how much the Romulans hated him for being a human. The Romulans have always detested the Remans, but they detested humans even more.

If Shinzon's exposure to humans was limited before being taken to Remus it would now be non-existent. He spent ten years of his life forced to live and work in darkness unable to see the stars above, the very stars he dreamt about as a young boy.

Shinzon's arrival on Remus was fortuitous in that he would be nurtured and raised by a Reman known as Vkruc, who gave Shinzon his present name and later became his Viceroy. Vkruc taught Shinzon the strength of personality so he might survive. Growing up on Remus, Shinzon would learn to hate both Romulans and Humans, even though he harbored a fascination with his origins.

He learned first hand through violence how detested the Reman caste was in Romulan society. Romulans who feel superior took this distaste out on their slaves in the mines. They used physical punishment, starvation, sleep deprivation, and any other method they could think of to ensure the production quota was met and the slaves kept in line. This taught Shinzon a lesson that focused his ambitions – Remans would never be given their freedom. If Remans were to know any semblance of freedom it could only be gained by forcibly taking it.

When the Dominion War broke out both Shinzon and Vkruc were drafted into the Romulan Imperial Fleet to serve with other Remans. It seems that Remans make ferocious warriors and male Remans were employed as frontline fighters – little more than cannon fodder.

About this time in Shinzon's life his genetic abilities moved to the forefront and he exhibited his tactical genius which led to his rise among the Remans. He also had a certain inborn arrogance, over-confidence and ambition which accompanied the genetic package from his progenitor Picard.

Shinzon ended up leading twelve successful engagements during the Dominion War, rising to such prominence within the Imperial Fleet that the Tal Shiar charged his Reman troops with the re-capture from the Dominion and destruction of a Tal Shiar base located within the Neutral Zone. The base had been the site of research into banned thaloron radiation weapons and was in imminent danger of capture by a Federation-Klingon task force. The Tal Shiar had intended to kill Shinzon after he destroyed the base, instead Shinzon captured the warbird sent to incinerate himself and his troops before the engagement.

It is at this point in his life that Shinzon developed into his own as a young commander, certain of his abilities and able to command those of a different race. He also started to gain allies within the Imperial Fleet and Romulan government, all in preparation for his eventual takeover. Shinzon courted leadership in the Imperial Fleet including Commanders Donatra and Suran, and Senators such as Tal'Aura. He won them with his promises of a war against the Federation in the post-war environment.

In secret, Shinzon gained his own personal starship, the Scimitar, a massive new warbird with advanced cloaking and disruptor technologies, which

he outfitted with a thaloron weapon. His rise to power had not gone unnoticed. He was now a prominent military leader and seen as a leader for the Remans at a time when talk of civil war loomed; however, few knew of Shinzon's secret plans.

Unfortunately by now Shinzon had learned a less happy secret about himself. He found out that he had been engineered to age quickly, losing thirty years to better reach Picard's current age. This temporal DNA sequence presented a huge problem as time grew near and the temporal sequence did not activate. Shinzon was unable to trigger it himself and learned a harsh truth. His only means of survival lay with a complete transfusion from his biological source, Jean Luc Picard.

Shinzon had no choice but to put his plans into action. During a full session of the Imperial Senate in the Hall of State, Tal'Aura left in the Senatorial Chambers a small thaloron weapon. Once activated, it killed Praetor Hiren, the Senate, and all other forms of organic life within the chambers. Shinzon declared himself the new Praetor, and succeeded in liberating the Remans. For the first time in Romulan history, a Reman had risen to the seat of Praetor.

Suffering from the beginning of decay that was imminent without a complete transfusion from Picard, Shinzon engages in an elaborate ploy. He lures Picard to Romulus with promises of a new peace with the Federation. His intentions were to kidnap Picard and gain tactical information on Starfleet deployments before killing him with the transfusion. Shinzon further planned to travel aboard the Scimitar to Earth, where consumed by his hatred of humanity, he would destroy all life on Earth with his ship-based thaloron weapon before betraying the Romulans and doing the same to them. It is here that he exhibits his psychotic side. Being raised among so much anger and hatred can often warp and fracture a person's psyche, perhaps more so for a clone. Clones always exhibit some sort of cellular breakdown and I believe that Shinzon's is not just the temporal DNA problem but a breakdown in his mental state that may have started when he was boy thrown into the mines.

Shinzon's personality started out exhibiting arrogance, over-confidence, and ambition just as his genetic source material dictated. Then his lack of human nurturing turned into a hatred of Humans. He had a reason to naturally hate the Romulans, especially when he found out that they engineered him, planning to use him as a pawn in an Imperial plan. Now as a child tossed into the mines on Remus he would have learned to identify with this oppressed race as he grew into manhood. It is natural that he might begin to feel on some level that he was a Reman. He demonstrated this while speaking to Picard after his capture. Picard wanted to know what all this was about and Shinzon replied, "It's about a Reman

outcast". This proved his identification with the Reman race and it continued even as his own death neared. Picard's response, "You're not a Reman..." Shinzon then cut him off, "And I'm not quite Human..." Here he revealed his feelings of betrayal and loss of natural identity. He was cheated at birth from ever really belonging to any race, even though he was a clone of a Human.

When Shinzon first meets with the Away Team from the Enterprise, he demonstrated that he had a flair for the theatrical – the darkened room, his arrival from above them, controlling the revelation of who he was until it suited him. When he turned the lights up he achieved his act of surprise and was guaranteed a response from Picard on a personal level.

While enjoying the control he exhibited over the Humans, Shinzon also experienced a fluctuation in his hormonal levels. Until now he had been denied any contact with Human females, and he was capable of feeling all the sexual drives young humans experience. Commander Donatra made flirtatious overtures after he became Praetor, but his hormones did not rise, instead he was repulsed and he told her, "You are not a woman. You are a Romulan.... If you ever touch me again, I will kill you."

Yet when he saw Deanna Troi in the Away Team, Shinzon was instantly attracted. "I've never met a Human woman before." He even expressed a desire to touch her hair. It was Picard who applied the breaks, bringing Shinzon back to the present reason for communications.

Being a clone of Picard, Shinzon knows how the human thinks. He knew exactly what Picard wanted to hear and so begins an attempt to pull Picard into his plan. When Picard asked what Shinzon wanted, the Praetor responded: "Unity, to tear down the walls between us, to recognize that we are one...". In a way Shinzon is foreshadowing what is to come between himself and Picard. He gives Picard the Romulan propaganda line – "We want peace." It is only after this baited hook, does Shinzon allow the lights to brighten and Picard to see his younger self.

Shinzon appears to be most patient with the Away Team, even inviting Picard to dinner. He is sociable, confident and perhaps genuinely happy when he gives the bloody blade to Data for analysis back on the Enterprise.

However, Shinzon has a short fuse, especially when dealing with Commander Suran. I suspect this is partly because he hates Romulans, and partially because the commander fails to show the proper respect Shinzon feels is his right as Praetor. Suran pushes stating that they only supported Shinzon because he said it was time for an attack on the Federation, but now Suran feels Shinzon is delaying.

Suran questions the purpose of bringing the Enterprise to Romulus.

When Picard comes to dinner, Shinzon appears to be charming, genuine and quite curious about his past. He even displays a half smile at times. Shinzon is probing to find out what it means to be a Human. He even goes so far as to explain why he does not look more like Picard. Shinzon does believe that a man's eyes reflect the life he's led and he comments that Picard's eyes are very confident.

Picard asked how many Romulans died so the Remans could gain freedom. Shinzon was forced to admit that too many had died. He also states he is glad that the Empire is finally beginning to realize there is a better way and that is the way of peace. The Praetor points out that if Picard had been him on Remus, he would be doing the same thing. Picard then pointed out that the reverse would also be true. Picard also said he could not involve his personal feelings in this matter and Shinzon remarked, "All I have are my personal feelings." He wants to know what it means to be a human. At some point every sentient creature will ask a similar question about himself as he develops a higher consciousness – even a clone.

After Picard returns to the Enterprise, the Viceroy, Vkruk has trouble understanding why Shinzon had to meet with Picard. He saw this dinner as a mistake – a waste of time. Shinzon's arrogance and temper shows when he says, "It's my time to waste and I shall spend it as I choose." He says this to the man who taught him to survive and who continues to help him as his physical condition begins to disintegrate. He's being an ungrateful child – a typical human reaction, even though he capitulates to return to the Scimitar with Vkruk.

Shinzon still desires physical contact with a woman, something Vkruk can only give him via a voyeur type of mind-link. Together they mind rape Deanna Troi. He is there with Deanna, above her, before Vkruk shows his true face and she breaks the link. However, Shinzon wants more and tells Vkruk to find her again. One has to wonder if this linking they share is partially how he has been able to survive such a violent life. For through this shared telepathic link with Vkruk, Shinzon seems to grow more stable, the pain lessens, allowing him to function better, but it will not prolong his life, only Picard can do that. I wonder if he would not have lived longer had he not sent Vkruk to capture Picard after the Enterprise and the Scimitar collided in space.

Shinzon has other genetic tendencies, which make his behavior almost like that of an identical twin among humans. He and Picard both favor hot tea. Shinzon carries himself the same way Picard does. He shares Picard's identical height and slight build. However, the similarity stops there, for Shinzon has a shorter fuse and we witness his anger flare up more

and more as his death approaches. For example: "We will not bow before anyone as slaves. Not the Romulans and not your mighty Federation." "We are a race bred for war and conquest," now Shinzon sounds more like the Romulans he hates, rather than the human he was cloned from.

The Praetor remains cool in battle despite his youth. He is also comfortable on his bridge as Picard is on the Enterprise. Shinzon orders weapons and strikes as well as maneuvers as if they were second nature, much as we see Captain Picard do.

Shinzon exhibits a burning desire that is almost all consuming. He wants so much to understand what it means to be a human. Yet, Picard's words fall on deaf ears when he tells Shinzon that humans have the potential to make themselves better than they are. That he should strive to be a better man to truly understand what it means to be human. This simple truth has no effect on Shinzon, he continued to display a flat affect. It almost seemed that he expected the answer to be something bigger.

In response he tells Picard, "I am what you see now. I am what life has made of me." He is displaying a defeatist attitude and is now wallowing in self pity. Now it becomes quite clear that he is psychotic and displays a lot of anger. "I am what I am. My voice will echo thru time while yours will fade and lessen with time." He demonstrates with this speech that he has learned to hate Picard even though his blood could save his life.

Picard tries to reach the clone's human side. "Shinzon, I am a mirror for you as well." Having a quick comeback Shinzon stated, "Not for long, Captain, I'm afraid you won't survive to witness the victory of the echo over the voice." He is still very arrogant, as Picard was in his own youth, but Shinzon is also very much like the Romulans he grew up with.

Shinzon seemed bent on not only destroying Picard, but also on committing genocide, the extermination of human life on Earth which scared Commander Donatra. It led her to persuade Commander Suran to help the Humans or else Shinzon's crime of genocide would dishonor and stain their hands with blood for many generations. The two commanders come to the aid of the Enterprise.

During the collision of the two ships, Shinzon exhibited the willingness to kill himself in order to destroy the Humans. He demonstrates new growth when he states that some ideals are worth dying for. Even though he was in pain and was dying, Shinzon still tried to destroy Picard in hand to hand combat. Picard had the advantage of being in better physical condition. He could think faster and pulled down a pipe from the wall. As Shinzon pulled his double-edged blade and charged at Picard, he was impaled on the pipe. Shinzon did not give up even in death. He pulled himself along the pipe in order to

reach Picard in an attempt to choke him. He told Picard that he was glad they were together at that moment and that their destiny was now complete. Shinzon died as he leaned against Picard.

In spite of his short life, his mental disturbance and the brief duration of his coup – the assassination of the Senate and Shinzon’s death occurred within three days of one-another – Shinzon surely left a mark on galactic history that cannot be forgotten. His term as Praetor may have been short, but it was influential and led to the reduction of the Empire from a galactic power. Unfortunately this destabilized the Alpha and Beta Quadrants for quite some time.
